Focus Areas

Current Data Reporting and Availability

- Merge and analyze current data reports
- Summarize current data elements and how these data can be used to support continuous improvement efforts for the PCFP
- In consultation with the Commission and NDE, identify data elements most relevant to monitoring PCFP implementation and effectiveness
- Develop a complete dataset of the most pertinent data

New Reporting Framework Development

- In consultation with NDE and the Commission, identify desired outcomes for the new reporting framework
- Based on the data reporting analysis, develop roadmap for new reporting framework
- Elicit design ideas to guide the development of the framework
- Develop a wireframe for the reporting portal and dashboard
- Facilitate input sessions with system leaders, key education partners and membership organizations on the new reporting framework

PCFP Early Implementation Impact Analysis

- Employing the newly compiled dataset, evaluate the impact of the PCFP on school expenditures, staffing, and several measures of student success and achievement
- Goal is to conduct a rigorous impact evaluation that can separate cause from correlation
- Analysis will provide information on how key outcome measures have changed across schools and districts since PCFP implementation
- Precise evaluation methods depend on the details of the PCFP and student needs assessments

Content-Area Expertise and Support for the Commission

- Attendance at all Commission meetings
- Agenda/goal setting support
- Discussion facilitation
- Information and resource gathering for Commission meeting presentations
- Subcommittee support for the Current Reporting and Data, New Reporting Framework, and Performance, Outcome and Trends subcommittees
- Separate from the accountability scope of work, the APA team will also present information on the NCEI and updating targeted funding levels
