Appendix

Reporting of Graduation Rates

- **How are graduation rates calculated?**

- Under ESSA (section 1111(h)(1)(C)(iii)(II)), SEA and LEA must calculate and report on its annual report card a four year adjusted cohort graduation rate (ACGR), disaggregated by subgroups.
- The four-year ACGR is the number of students who graduate from high school in four years with a regular high school diploma, plus all students with the most significant cognitive disabilities who are assessed using an alternate assessment aligned with alternate academic achievement standards and who graduate with a State-defined alternate diploma, divided by the number of students who form the adjusted cohort for the graduating class.

- **What is the difference between a cohort and a graduating class?**

- Cohort is the student population based on the number of students who enter grade 9 for the first time adjusted by adding into any student who transfers in later during grade 9 or during the next three years and subtracting any student who transfers out, emigrates to another country, or dies during that same period.
- Graduating class means a group of pupils who, as of the date on which they begin high school, are scheduled to graduate from high school at the end of a specified school year.

- **Where does the data come from?**

- Data is provided by the LEAs.

- **What is the NDE timeline for data collection and reporting?**

- 10/04/2021 Data validation started.
- 10/27/2021 Data validation ended.
- 11/17/2021 Graduation rates are released to public.

Nevada Non-Diploma Credentials

- **Adjusted Diploma (NAC 389.015):** a diploma which evidences the graduation from high school of a pupil with a disability after the pupil has met special requirements or adjusted standards
- **High School Equivalency Certificate:** a certificate which is given to adults who pass the high school equivalency tests. The certificate is widely recognized as the equivalent of a high school diploma but is not counted as a graduate in the ACGR.
