

The Secure Exit Shade

The Standardized Classroom Window Cover

Key Features

- Covers most standard classroom windows
- Completely obscures view of classroom from outside
- Four-color status wheel provides room status to administrators and emergency personnel
- Instructions, color codes, and class procedures printed on inside: Internal printing can be custom per state, county, or even per school
- Optional silicon backing elastically rebounds to fill in bullet holes to ensure continued classroom obscurity in the event of an active shooter
- Secured by strong magnets and constant torque hinges, the **Secure Exit Shade** is easy to pull down, yet secure against unfolding on its own.
- Designed by a Nevada school teacher and manufactured in the USA.

The Secure Exit Shade

The Standardized Classroom Window Cover

W SET TO WHITE FOR CODE RED
DO NOT SET A COLOR FOR A CODE RED UNTIL A ROOM STATUS UPDATE IS REQUESTED. WHITE SETTINGS IS TO DENY PERPETRATORS KNOWLEDGE OF ROOM OCCUPANCY & STATUS.

CODE YELLOW ONLY
DO NOT SET COLORS FOR CODE RED.

R

RED
Wounded inside, needs medical assistance.

Y

YELLOW
Missing students, and/or additional students with you.

G

GREEN
All students inside and accounted for.

PANEL 2
Describes what each of the colors mean on the status or color wheel.

PANEL 3
Turn color wheel to a certain color to indicate status of the room. On the back of the *Secure Exit Shade* there is a triangle cut-out which allows the color to be seen by emergency personnel.

DENIES PERPETRATORS KNOWLEDGE OF OCCUPANCY IN CLASSROOM

ALL STUDENTS ACCOUNTED FOR

MISSING OR ADDITIONAL STUDENTS IN CLASSROOM

WOUNDED PEOPLE INSIDE

WHAT TO DO DURING A CODE

YELLOW

- Secure students away from the perimeter by locking doors and windows. Clear corridors and class stands during a Code Yellow and evacuate students as needed.
- Students in the hallway or hallway entrance to the nearest classroom and/or outside to class.
- Set the window shade to the appropriate color when asked.
- Do NOT leave with your status in the subject line, include your status and room number using the color code below: Sx-C-Code.
- Do NOT unnecessarily move in and around the building and Code Yellow/Red/Secure Exit Shade and THE CODE IS UNANNOUNCED and repeat these three steps if you are released by alarm, emergency responder and/or fire department.

RED

- FOR ALL CODES: Secure students and staff in classrooms with doors locked. Turn off the lights, cover your windows, hide students away from doors and windows, and remain silent.
- If Code Red occurs during a transition time, please avoid students who are moving around the room until you are with your students.
- Do NOT set color wheel during a code red, leave on white setting.
- Do NOT leave with your status in the subject line, include your status and room number using the color code below: Sx-C-Code.
- DO NOT OPEN THE DOOR FOR ANYONE! Code Red is silent when an alarm or emergency vehicle and open your door, turn on lights, and say "The Code Red is silent!"

PANEL 4
Displays instructions for code yellow and code red.

PANEL 5
Displays the word 'EXIT' with instructions to pull down during an emergency.

The Secure Exit Shade

The Standardized Classroom Window Cover

The **Secure Exit Shade** is designed for lockdown emergencies at schools. When pulled down over the classroom window it,

- Blocks the view of intruders
- Provides an extra layer of protection
- Gives emergency instructions to teachers, and
- Provides classroom status information for emergency personnel or police.

The **Secure Exit Shade** is made of powder coated metal that is folded into sections and is held together using heavy duty magnets. Each section or panel is attached using a small hinge that allows the shade to be folded up or down. The sides of the shade act as feet and are bolted to the inside of classroom door. It straddles the window and can be moved up or down over the window frame to assure a proper fit. When the **Secure Exit Shade** is not deployed or pulled down, it remains folded up at the top of the window displaying the "Exit" panel. The Secure Exit Shade is extended by pulling down on a cut-out tube-shaped handle or by attaching a lanyard for greater reach.

The **Secure Exit Shade** solves several problems for teachers during lockdown procedures and is far superior to any product on the market. Every school in the United States has the same emergency procedures during an event of lockdown. However, there is nothing on the windows or anything that would help organize and speed up the response time during emergencies quite like the **Secure Exit Shade**.

Specifications

Specifics	Details
Unit Dimensions Folded [L/W/D]	8.75" x 14.44" x 1"
Unit Dimensions Extended [L/W/D]	41" x 14.44" x 1" (hangs 1" from door)
Unit Weight	3.15 lbs
Material	ASTM -A-653 G30 Zero Spangle 20 Gauge Galvanized Steel
M Material	0.05" Thick Aluminum 5052-H32
Material	Steel and aluminum sourced from US based mills and suppliers
Finish	Fine texture Matte White, finger print resistant, with full printing
Mounting	4x holes on top and bottom sides for secure mounting
Mounting	Unit must have minimum of 2 of 4 holes mounted into door window frame to securely
Included Parts	4x stainless steel wood screws
Homologation	RoHS / REACH Compliant
Product Warranty Period	5-year limited warranty
Country Of Manufacture	Made in the USA
