

National Advisory Commission on Mentoring (NACOM)

Collaborative Feedback Team Community Agreements 2019

1. We are here to establish a “Community” vested in collaboration with the willingness to develop and implement strategies that will benefit “all” (all meaning all). We define “Community” as a group of individuals coming together under a “Commission” established by the Governor of Nevada, charged with supporting and facilitating mentorship programs in the State that focus on Mental Health and Family Wellness, Criminal Justice and Employment, and Academic Capacity Building.
2. We are all present with the “mindset of transforming” through “Community.”
3. Engage the work without hubris and find value in critical analysis toward realizing and sustaining a lens for continuous mentee / mentor opportunity, outcomes and organizational improvement
4. We will tell our “Truth as we know it” and “Listen” for the “Truth” of others.
5. We will attempt to make meaning and be open to outcome through shared “air time.”
6. We will be “unapologetically transparent” about the needs of the “Community.”
7. We will hold all community members “Accountable.”
8. We will approach the development and implementation process with “commitment” rather than just “compliance.”
