

Annual Test Security Summary for Nevada Public Schools, 2025-26

The Nevada Department of Education (hereafter referred to as “the Department”) establishes test security and administration protocol for the purpose of upholding the integrity of state-mandated assessments, maintaining consistency in test administration, and ensuring the validity of scores by means of uniform procedures (NRS 390.105, NAC 390.240). Each year, approximately 350,000 students participate in multiple assessments administered in grades K through 12 with approximately 1,500,000 separate test sessions in over 700 locations. In the 2025-26 school year, there were 933 reported testing irregularities, constituting 0.06% of all administrations.

Overview of Reported Test Irregularities:

- The 2025-26 school year experienced a 1.2% increase in total reported testing irregularities, up 11 from 922 in 2024-25.
- Nevada’s Summative Assessments in English Language Arts (ELA) and Mathematics are annually administered to students in grades 3 through 8, and resulted in 403 incidents, a 2% increase from 395 in 2024-25. This being Nevada’s largest assessment, it accounted for 44% of all reported incidents.
- Nevada’s Science Assessments are annually administered to students in grades 5, 8, and high school. There were 90 reported irregularities for fifth and eighth grades, and 34 at the high school level, resulting in a 35% increase over 2024-25.
- The Nevada Alternate Assessment (NAA) is administered to less than 1% of students with disabilities in Nevada, who meet the strict eligibility criteria to be assessed using alternate achievement standards. There were 75 irregularities reported for the 2025-26 school year, 6% higher than 2024-25.
- The ACT is Nevada’s College and Career Readiness Assessment and is administered to all grade 11 students. At a 15% decrease from 2024-25, there were 110 irregularities reported for this assessment.
- The WIDA suite of assessments are Nevada’s English Language Proficiency Assessments. WIDA results are used to determine supports required for students’ English Language instruction. This year’s WIDA administrations resulted in 181 reported irregularities, a 17% decrease from 2024-25.
- Nevada state law requires tests that are not required by the US Department of Education. Tests such as iReady and Career and Technical Education assessments are not reported under ESSA (US PL114-95) but are implemented to fulfill their respective Nevada Revised Statutes. Increasing by 36 from 2024-25, there were a combined total of 40 reported state testing irregularities not associated with federally-mandated assessments in 2025-26.

Annual Test Security Summary for Nevada Public Schools, 2025-26

- Incidents reported as testing irregularities covered a broad range of occurrences and varying degrees of severity (see page 3 for more information). The primary incident types were as follows:
 - Improper Test Administration includes all types of procedural errors, most notably students tested with missing or incorrect accommodations, and technology-related malfunctions and user errors. This accounted for 357 incidents in 2025-26, a significant increase from 287 incidents in 2024-25, and comprising 38% of incidents.
 - Student Cheating or Misconduct was responsible for 24% of all reported incidents, decreasing from 255 in 2024-25 to 211 in 2025-26. The most common events in this category are students retaining possession of personal phones or other digital devices, misusing testing devices, or interacting with others during testing.
 - Testing Interruptions decreased for 2025-26, accounting for 20% of all irregularity reports at 199 incidents, compared to 224 in 2024-25. These interruptions were most commonly caused by student illness or technical malfunctions.

Causes and Outcomes

- Among the reported irregularities, 269 cases, 29% of irregularities resulted from insufficient preparation for assessment by staff, often due to insufficient professional, non-instructional, time allotments. Common examples of this type of irregularity are students being given other students' tests, non-compliant management of time, space, or materials, and IEP/504 accommodations not implemented or implemented incorrectly.
- Events involving misused or malfunctioning testing technology can be attributed to insufficient staff capacity and a focus on efficiency and speed over attention to detail. These events include incorrect or insufficient student instruction for device use, failure to correctly manage student digital records or materials, and site-based device failures or wi-fi malfunctions. 245 incidents comprised 26% of this year's irregularities.
- Student use of unapproved technology and supports remained a strong concern in 2025-26, comprising 23% of all irregularities. Improved detection methods and expanded training in non-federal programs have contributed to a corresponding increase in reporting, with 175 incidents of students in possession of devices, and 36 incidents of inauthentic responses, up from 147 and 25 respectively in 2024-25.
- Interruptions outside the control of testing staff include parent pickups during testing, evacuations & lockdowns, student health events, and power or internet outages. These causes contributed to 104 incidents in 2025-26, or 11% of assessments.

Unresolved Cases for Prior Years

No cases reported during prior years remain unresolved.

Additional Examinations

Pursuant to NRS 390.290, there were no additional examinations administered during the 2025-26 school year.

Recommendations

In order to decrease the number of testing irregularities and to foster a culture of testing integrity, the following policies and procedures may be implemented:

- Secure, web-based software is used to report and keep record of irregularities. Iterative improvements, both in the software and in annual training regarding its use, continue to improve efficiency and accuracy of recordkeeping and analytics, and process and platform updates will continue to improve these processes.
- The Department's annual program of test security and administration training, required for all testing staff, was revised in its entirety for the 2025-26 school year, and continued revisions are planned to better address prevailing concerns and emergent needs.
- The Department intends to increase the frequency of webinars for district-level staff, both to address the most frequently observed test security and test administration challenges and to support emergent district-level concerns, in an established train-the-trainer model.
- On-site, in-progress, assessment monitoring by Department staff, implemented to meet state and federal requirements for test security and standardized administration, also experienced significant disruption this year. Improved in-school State oversight, as well as improved rigor with regards to observation protocols being implemented during such monitoring, should improve support for districts and schools in improving identification and remediation of test security issues.

Summary and Considerations

Maintaining the integrity of Nevada's state testing program ensures valid scores, providing accurate and actionable data to drive Legislative and Executive decision-making efforts. The reliability of this data can only be achieved through consistent application of, and uniform adherence to, standardized test security protocols.

Declining enrollment in recent years has not similarly decreased the annual count of testing irregularities, and this trend results from a variety of causal factors previously described. As the Department continues to recover from administrative setbacks related to this year's widespread security incident, redirecting these efforts and resources back to district and school presence and support sets an expectation for improved security in the coming year.

Looking forward, the Department is committed to ameliorating irregularities through improved support for Nevada's districts, educators, and students with comprehensive training materials, on-site monitoring activities, and webinars to instill and support a culture of testing integrity.
