Recommended Schedule of Future Commission & Subcommittee Meetings

Grounding in a mindset shift happening NOW in the field of systems evaluation...

“Treating a system or policymaking as deterministic, i.e. the same outcome will result from repeating the same action or intervention, is inappropriate in complex environments” CECAN, 2020

Characteristics of Systems

Parts are interdependent such a change in one part changes all parts

The whole is greater than the sum of the parts

Consist of interconnected relationships

Boundaries socially constructed

Perspectives vary

Systems are made up of sub-systems and function within larger systems

Operating within Complex Systems

Our CIEE System

As a Whole Commission and as Subcommittees, we commit to:

Future-focused, systemic approach supported by learning from:

- Existing studies within Nevada
- Policy exemplars and lessons learned from other states / jurisdictions
- Recommendations from local voices & stakeholders

Collaboratively working to:

- Identify gaps & opportunities through feedback and stakeholder engagement
- Draft policy recommendations to be stress tested with the Commission
- Iterate upon feedback to ensure all policy positions Nevada to deliver world class education.

Subcommittee Reflections

and planning

Given what we have heard from the other groups, how are we thinking differently about our work and the priorities for our future meetings?
